

Tableau Product Family

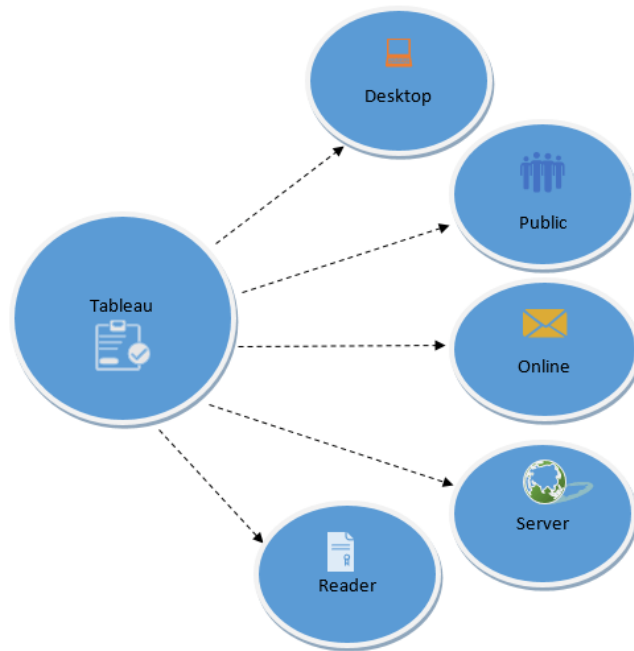

Tableau Desktop

- Can be installed on Windows or Mac, single-user version
- Tableau Desktop has a rich feature set and allows you to code and customise reports

Tableau Server

- An enterprise-level Tableau software
- We can publish dashboards with Tableau Desktop and share them with a web-based Tableau server throughout the organisation.

Tableau Online

- It is a hosted version of the Tableau Server.
- Its functionalities are similar to Tableau Server, but the data is stored on servers hosted in the cloud, which the Tableau group maintains.

Tableau Reader

- It's a free desktop application and a read-only tool
- It enables you to open and view visualisations that are built-in Tableau Desktop.
- You can filter and drill down data, but you cannot edit or perform any interactions.

Tableau Prep

- It's a tool designed to make preparing your data easy and intuitive.
- Used to combine, shape, and clean data for analysis.

Tableau Public

- It's a Free version of Tableau to create visualisations.
- But you need to save your workbook or worksheets in the Tableau Server, which can be viewed by anyone.

Tableau Installation

How to Save:-

Initially, you need to create a Tableau Public profile in order to save your visualisations, dashboard and story created in Tableau as they can't be saved on your local device.
