In this lecture, you will learn -

1. About different type of Databases
2. Database creation with SQL queries
3. About formatting practice

Outcome-

By the end of this lecture, you will have an understanding of available databases. Also you will able to create a database and tables through SQL queries

To make the best use of this lecture, we advise you to keep the following points in mind -

Tool to be used: Download and install MySQL according to your operating system and execute it.

Take Notes: While you are watching a video, it is always good to have a pen and paper to take note of all the important concepts covered in the video. It will help you in remembering those concepts better.

Additional Resources: We have covered all the important concepts through videos and notes , but it is always better to explore some additional resources available online. We have compiled some notes after the video lecture for your reference.

Try it yourself: After watching the video try to practice the same. You can write your own additional queries and execute them on your SQL platform.

Best Practice : We encourage you to explore more with more with MySQL platform and the queries of the creation to learn about it.
